Delta Services Safety, LLC Consulting

Business owners recognize that the cost of project insurance can be overwhelming. In fact, some estimates cite premium increases as high as 300 percent! The unpredictable costs associated with today's insurance environment can pose a negative impact on projects. Accordingly, many owners are choosing Owner Controlled Insurance Programs (OCIP) in order to maintain consistent safety standards while still controlling costs. OCIP can potentially reduce an owner's project costs by 1 to 2 percent. When the total project cost is in the millions, OCIP translates into significant cost savings.

Delta Services Safety, LLC is a team of dedicated safety consulting professionals whose practice is the structure and implementation of workplace safety, corporate loss control and regulatory compliance. Our staff not only holds highly technical degrees but they have practical "in-field safety" experience. We bring a reality to what works and what does not in every situation.

We Recognize that clients not only require answers to their questions, but also seek direction or methods to anticipate safety issues before they arise.

*Our Safety Services Provide
Remarkable Flexibility
to Meet Your Needs.*
